Education

Universidade do Porto <i>Master's Degree in Informatics and Computing Engineering</i> • Relevant Coursework: Digital Game Design and Development, Virtual and Augmented Reality, Interactive Graphics Systems, Computer Vision, Artificial Intelligence, Large-Scale Distributed Systems	Sep 2024 - Jul 2026 Porto, Portugal
Universidade do Minho <i>Bachelor's Degree in Informatics Engineering</i>	Sep 2022 - Jul 2024 Braga, Portugal
Universidade do Minho <i>Bachelor's Degree in Biomedical Engineering</i>	Sep 2020 - Jul 2024 Braga, Portugal

Experience

Mindera <i>Master Thesis Intern</i> Developed an internal project aimed at creating an AI agent capable of acting as a second player in two-player video games . Engineered the AI to prioritize human-like behavior and believability during gameplay, optimizing for realistic interactions rather than flawless performance. Integrated computer vision and AI models to process in-game environments in real-time , utilizing NVIDIA NitroGen, YOLO, and Grounding DINO .	Feb 2026 - Jun 2026 Porto, Portugal
---	--

Projects

Escape do Saber <i>Unity</i> Developed an educational Virtual Reality escape room for the Meta Quest 2 as part of the Virtual and Augmented Reality course. Designed and implemented 3 subject-related educational mini-games focused on color mixing mechanics, anatomy (skeleton assembly), and English language comprehension. Created an interactive ending where users complete the experience by collecting a graduation cap.	Repo Link
Balloon Popping Robot Competition <i>Unity, ML-Agents</i> Engineered a MARL competition in Unity using ML-Agents to simulate an autonomous team-based Battle Royale tournament . Applied POCA and Curriculum Learning to train robot agents to navigate asymmetric obstacles and adapt to shrinking arena constraints. Equipped agents with Ray Perception Sensors for real-time obstacle avoidance, offensive tactics, and resource collection.	Repo Link
Right Under Your Moustache <i>Godot</i> Co-developed a 2D puzzle-stealth game in Godot as part of the Digital Game Design and Development course. Programmed core gameplay mechanics, including player special abilities, puzzle logic, and enemy detection systems. Designed original visual assets , character models, background elements, and integrated immersive audio and sound effects.	Repo Link
Races <i>Unity, Vuforia AR</i> Developed a mobile Augmented Reality (AR) racing game for the Virtual and Augmented Reality course using Vuforia . Programmed core mechanics, including an AI opponent with selectable difficulties, motion-based controls, and a 6-scene UI flow. Designed a strategic phase allowing players to dynamically place obstacles and power-ups on the track using AR markers.	Repo Link

Skills

Technical Skills Game Dev: Godot, Unity IA & Machine Learning: Unity ML-Agents, NitroGen, YOLO, Grounding DINO Backend: C, C#, C++, Python, Java, Haskell, .NET Frontend: JavaScript, React, Vue.js, HTML/CSS, Pug Mobile: Kotlin, React Native, Flutter Databases: MongoDB, MySQL, Redis, PostgreSQL, Neo4j	Languages Portuguese: Native English: Fluent Spanish: Basic

Leadership & Volunteering

Vice-president of Literatuna – University of Minho <i>Student Organization Leadership: Coordinated activities and performances of a university musical group.</i>	Sep 2023 – Jul 2024 Braga, Portugal
Erasmus+ Project – ANIMA 2022 <i>International Sociocultural Event: International meeting of sociocultural animation.</i>	May 2022 Portugal / Europe
Volunteer – Extracurricular Classes <i>Volunteering: Taught extracurricular classes to children aged 6–9, promoting environmental awareness.</i>	Sep 2022 – Mar 2023 Braga, Portugal
