Education

Universidade do Porto

Expected Jul 2026

Master's Degree in Informatics and Computing Engineering

Porto, Portugal

- **Relevant Coursework:** Digital Game Design and Development, Virtual and Augmented Reality, Intelligent Robotics, Interactive Graphics Systems, Large-Scale Distributed Systems

Universidade do Minho

Jul 2024

Bachelor's Degree in Informatics Engineering

Braga, Portugal

- Graduated with strong focus on software development, computer systems, and algorithms

Universidade do Minho

Jul 2024

Bachelor's Degree in Biomedical Engineering

Braga, Portugal

- Multidisciplinary background that combines programming fundamentals, electronics, mechanics, materials, and biology

Projects

Right Under Your Moustache | Godot

[Repo Link](#)

- This project was developed as part of the Digital Game Design and Development course. The objective of the **game**, developed in **Godot**, is to solve puzzles as quickly as possible without being detected in order to obtain the exam from Professor Augusto. To assist the player, we provide special powers.
- The entire game was programmed by me and my colleague. Additionally, we were responsible for the game's design, from the characters to all the background elements. We aimed to make the game as user-friendly as possible, incorporating sounds and music to enhance the experience.

Races | Unity, C#, Vuforia AR

[Repo Link](#)

- This project was developed for the Virtual and Augmented Reality course. It is an **augmented reality racing game** where the player competes against a bot with selectable difficulty levels. The game includes a strategic planning phase where the player places **obstacles and power-ups** on the track using **AR markers** before the race begins.
- I contributed to both **programming and game design**, including the integration of AR technologies (Vuforia), gameplay mechanics, UI flow across six scenes, and asset implementation. The goal was to create a fun and interactive mobile AR experience with **motion-based controls**.

Receitas | Kotlin, JSON

[Repo Link](#)

- Receitas is a **mobile app** built in **Kotlin** to keep everything organized. I'm always experimenting with new recipes, and writing them down on paper often makes it hard to keep track.
- That's why I built this application. It allows me to add, update, delete, and view my recipes in a much more efficient way.
- I can also download a **JSON** file with all my recipes in case I want to import them into another application.

Skills

Technical Skills

Game Dev: Godot, Unity

Backend: Python, C, C#, C++ Java, Haskell, .NET

Frontend: JavaScript, React, Vue.js, HTML/CSS, Pug

Mobile: Kotlin, React Native, Flutter

Databases: MongoDB, MySQL, Redis, SQL Server, PostgreSQL, Cassandra, Neo4j, HBase

Tools: Markdown, $\LaTeX$, Figma, Docker, Visual Paradigm, SolidWorks, Matlab, Microsoft Office

Soft Skills

Self-taught

Creative

Persistent

Resourceful

Dedicated

Friendly

Charismatic

Languages

Portuguese: Native

English: Independent

Spanish: Basic

Leadership & Volunteering

Vice-president of Literatuna – University of Minho

2023 – 2024

Student Organization Leadership

Braga, Portugal

- Coordinated activities and performances of a university musical group.

Erasmus+ Project – ANIMA 2022

2022

International Sociocultural Event

Portugal / Europe

- International meeting of sociocultural animation.

Volunteer – Extracurricular Classes

2022

Volunteering

Braga, Portugal

- Taught extracurricular classes to children aged 6–9, promoting environmental awareness through educational activities.

Summer School of Physics – FCUP

2019

Academic Participation

Porto, Portugal

- Course in relativity, quantum mechanics and nanotechnology held by FCUP.

Erasmus+ Project – Differences – Survival Camp

2018

Youth Inclusion Project

Gerês, Portugal

- Support to reintegration of young people with disabilities.
